

YOUR MOST VALUABLE ASSET IS YOUR DATA. SO SECURING IT IS A NECESSITY!

Caleb IT Solutions' remote data backup services delivers a high level of defense against lost data. Call us today to implement our automatic, off-site, encrypted data backup on a cycle to match your business exposure. We also offer the latest in disaster recovery Solutions.

YOUR OUTSOURCED IT SUPPORT

In a fast-paced business environment, many companies find their IT demands often outpace their internal capabilities. Caleb IT Solutions provides outsourced IT support to host and manage your infrastructure and/or components of it. We seek to work with companies with and without internal IT departments to help address bandwidth issues, augment skill sets and manage projects – allowing your staff to work more efficiently and effectively

YOUR MAINTENANCE OUTSOURCING

IT maintenance to Caleb IT Solutions enables your business to return its focus to front burner initiatives – those that advance your company towards your goals. We provide both onsite and remote support to manage servers, back-up workstations, update software and hardware with patches and new releases; repair and replace and much more. Leverage the expertise of Caleb IT Solutions to maintain the technology foundation of your business.

YOUR SECURITY

Everyday, outside influences can bring something new and potentially dangerous inside your network. Caleb IT Solutions protects your business by configuring and managing firewalls, updating virus/spyware/malware, and monitoring your network for any vulnerabilities or attacks. Our team also provides emergency services support, giving you the confidence to address unforeseen circumstances.
